

203

FEATURES

- ❖ Two to Three-Person Infrared Sauna Room
- ❖ Modern, Elegant Style
- ❖ CD with Radio
- ❖ Ceramic Heater
- ❖ Comfortable Back Support
- ❖ Chromotherapy LED lights
- ❖ Exterior and interior controls
- ❖ Tempered Glass Door & Windows
- ❖ Temperature Sensor
- ❖ FM Transmitter (Optional Extra)

TECHNICAL INFORMATION

- **Materials:** Hemlock Wood
- **Power supply:** 110/120 V, 1800W
- **Dimensions:** 61 x 44 x 76.5 IN

FAR INFRARED SAUNA SPECIFICATIONS

Power Input	110/120 V
Capacity	2-3 Adults
Operating Temperature	67-158°F
Recommend Usage	100 – 130°F
Setup Time	Less than 1 Hour
Heater Materials	Ceramic
Power	1800 Watts
Heaters	6 Sauna Heat Emitters
Warranty	3-Year Parts Warranty

ELECTRICAL INFORMATION

- 12-2 line 110V with 20 Amp Breaker on Dedicated line.

GENERAL INFORMATION

- An infrared sauna does not heat the surrounding air to the same degree that a traditional sauna does. Instead, it heats the body directly with infrared heat waves, raising the body's core temperature instead its surface temperature. The result is a drastically lower ambient temperature, typically in the 100F to 130F range. It's subsequently not necessary to raise the humidity within the sauna, which means that an infrared sauna won't be filled with steam in the same way. Infrareds also require a significantly less warm-up time than traditional saunas, again because it isn't necessary to raise the air temperature as high.
